Bluetooth® Class1 USB Mini Dongle ID-BTCL1

Quick Start Guide

Introduction

This Bluetooth® USB adaptor allows you to connect your PC to a Bluetooth® enabled mobile phone or to another Bluetooth® device such a mouse or a headset.

Installation

Please install first the software provided on the installation CD before plugging the Bluetooth® USB dongle.
Once the software is installed, please reboot your PC and plug the Bluetooth® USB dongle to a free USB port of your PC.
You can now launch the IVT® Bluesoleil™ software provided on the application CD to enjoy the functionalities of your Bluetooth® USB dongle.

About IVT Bluesoleil Software

BlueSoleil is a Windows-based software from IVT that allows your *Bluetooth*® enabled desktop or notebook computer to wirelessly connect to other *Bluetooth* enabled devices. BlueSoleil allows MS Windows users to wirelessly access a wide variety of *Bluetooth* enabled digital devices, such as cameras, mobile phones, headsets, printers, and GPS receivers. You can also form networks and exchange data with other *Bluetooth* enabled computers or PDA's.

In order to connect and share services via *Bluetooth* wireless technology, two devices must support the same *Bluetooth* Profile(s) as well as opposite device roles (i.e., one must be the server, and the other must be the client). *Bluetooth* enabled devices often support multiple profiles, and if involved in multiple connections, can perform different device roles simultaneously.
BlueSoleil supports the following *Bluetooth* functions (Profiles) in the following device roles:

Bluetooth Functions (Profiles)	Client	Server
AV Headphone*	V	V
Basic Image Profile	V	V

Dial-Up Networking	V	
Fax	V	
File Transfer	V	V
Headset*	V	V
Human Interface Device	V	
LAN access	V	V
Object Push	V	V
Personal Area Networking	V	V
Printer	V	
Serial Port	V	V
Synchronization	V	V

Notes:
• Only one Headset or AV Headphone connection can exist at a time, since there is only one virtual Bluetooth audio device.
• The Headset and AV Headphone Profiles do not work on Windows 98SE or Windows Me.

Platforms supported by BlueSoleil include:
Windows 98SE/ME
Windows 2000/XP

Establish Bluetooth® Connection

A connection is normally initiated from the client (for example your Bluetooth® mobile phone)
On the server side (for example your PC), start the service.
On the client side, initiate the connection.
Start Service on Server
If BlueSoleil provides service, please start the service:
Change to Service Window.
Right-click the service icon, select **Start Service** on the pop-up menu.
Initiate Connection on Client
In Main Window:
Single click my device, the center ball, to search the *Bluetooth*® devices in range.
Search the selected *Bluetooth*® device service by double-clicking the device icon.
Service button on the top of the BlueSoleil Main Window will be highlighted if the service is supported by the device.
Enter the same *Bluetooth*® passkey on both devices if necessary to pair the two devices.
Connect.
Single-click the highlighted service button to establish the connection.

Please refer to the online user guide provided on the CD for more information about the using of IVT Bluesoleil software.
